SOFT SKILLS

Leadership
Strategic Problem-Solving
Decision-Making
Adaptability
Collaboration
Communication
Time Management
Prioritization
Analytical Thinking
Creative Innovation

TECHNICAL SKILLS

Generative AI

Agentic Workflows
Function Calling
Structured Output Reasoning
RAG
GAN

AI & Machine Learning

CNN
Attention Mechanisms
XGBoost
Random Forests
KNN
NLP

MLOps & DevOps

CI/CD
Docker
AWS
Azure
Git
API Development
VectorDB
GPU Acceleration

Programming

Python
Typescript
SQL
React
FastAPI
TensorFlow
PyTorch
Keras
Scikit-learn

LANGUAGE

English — Bilingual
French — Native

PROFILE

Innovative Data Scientist expert in AI automation, retrieval-augmented generation (RAG), and large-scale CI/CD optimization. Proven success in delivering multi-million-dollar savings, scaling AI solutions to thousands of users, and transitioning cutting-edge research into production. Skilled in leading full AI project lifecycles with a focus on impact, efficiency, and scalable knowledge management.

PROFESSIONAL EXPERIENCE

Lead Research Data Scientist

Amadeus, France
February 2024 – Present

- Built an agentic self-healing CI/CD workflow that raised auto-fix coverage from 10%→80% and increased fix rates from 2%→24%, saving $26M/year by drastically reducing developer time on build failure resolution.
- Designed a deep learning continuous learning pipeline boosting CI/CD flaky failure classification accuracy from 70%→95%.
- Engineered a RAG-powered CI/CD fix recommendation system combining historical and real-time failure data, cutting resolution times and standardizing troubleshooting across the company.
- Applied statistical and exploratory analysis to identify developer behavior trends and root causes of build failures, delivering actionable insights to 10,000+ developers.

Undergraduate Data Science Researcher

Alten, France
August 2023 – February 2024

- Led research on iterative narrative systems and retrieval-augmented generation (RAG), producing four published scientific and technical reports.
- Built a secure knowledge base covering 90% of company project documentation from data collected across 150+ employees and 25 projects.
- Designed a chatbot architecture and high-performance RAG model with knowledge graph integration, improving positive human feedback by 25% vs. prior best models.
- Developed and deployed a web platform integrating AI/ML models, onboarding 30+ engineers and reducing internal documentation search time.

EDUCATION

Master Of Science - Data Science & AI

Data ScienceTech Institute - Sophia Antipolis, France
September 2021 - August 2023

- Departmental Honors, Summa Cum Laude

Bachelor Of Science - Physics

Saint Joseph University - Lebanon
September 2017 - May 2021
